

Going Green

Our Commitment to Reducing our Impact on the Environment

Our Venue Hire Team are committed to protecting and reducing our impact on the environment and have adopted the following principles:

1. A commitment to reducing waste and using environmentally friendly and recycled products where possible. We have introduced recycling waste bins in the Education and Conference Centre and are seeking to reduce our food waste.

2. Reducing single use plastic and have introduced bottled table water for our venue hire customers.

3. Reducing water usage and have re-introduced jugs of table water for our venue hire customers. We also encourage visitors to bring water bottles and refill from our water cooler.

4. We are committed to being energy efficient. Our award-winning building benefits from environmental features including solar panels, green roofs, and motion censored lighting. We provide venue hire hospitality and source local produce where possible for our buffet menus.

The **Education and Conference Centre** is a Meet Cambridge venue and was featured in an article in [Conference News](#) about food sustainability (page 22). We are also a member of the [Cambridge Sustainable Food Network](#).

If you are interested in supporting our *Going Green* campaign, please get in touch. To find out more about [hiring our Conference Room](#) for your event contact our Venue Hire Team at venuehire@arhc.org.uk
